## **AMX Proves Less Is More When It Comes to All-In-One Presentation Switching**

### **Adds Two New Enova DVX Models Bringing Conference Room Technology to an Even Wider Range of Spaces**

**Southport, 25 June 2014** – Empowering more users to access advanced meeting room technology in more spaces, at [InfoComm 2014](#), [AMX](#)<sup>®</sup>, a [HARMAN](#)<sup>®</sup> Professional brand, addressed the needs of users of smaller meeting rooms by introducing its 11th and 12th All-In-One Presentation Switcher models, the [Enova](#)<sup>®</sup> [DVX-2110HD-SP](#) and [Enova DVX-2110HD-T](#). Featuring fewer source inputs than any previous Enova DVX, these models are ideal for smaller meeting rooms or classrooms that typically only require three or four AV sources but could benefit from all of the functionality that has made the Enova DVX Series popular for presentation switching.

To accommodate just about any analog or digital source, the Enova DVX-2110 features four video inputs including two multi-format DVI inputs that accept both analog and digital video sources and two HDMI inputs. All inputs are HDMI/HDCP capable. The new DVX-2110 retains all of the features that come standard on every Enova DVX, including AV switching, an integrated NetLinx controller, professional audio DSP, amplifier and twisted pair distance transport. The DVX-2110 also includes exclusive AMX technologies including SmartScale<sup>®</sup> for perfectly scaled video on every output and InstaGate Pro™ to eliminate key constraints and delays when switching HDMI/HDCP sources. The DVX-2110 is available in two models - the DVX-2110HD-SP features 2x25w - 8 Ohm amplification and the DVX-2110HD-T features 75w -70V/100V amplification.

And to ensure the DVX-2110 can be quickly and easily integrated into applicable system designs, it is immediately available as a configurable device in the [AMX Rapid Project Maker \(RPM\)](#) configuration tool.

#### **Availability and Additional Details**

AMX will be demonstrating its new Enova DVX at Integrate in association with InfoComm & Cedia, August 2014 and is already shipping in Australia and New Zealand.

#### **About AMX**

AMX hardware and software solutions simplify the way people interact with technology. With the increasing number of technologies and operating platforms at work and home, AMX solves the complexity of managing this technology with reliable, consistent and scalable systems. Our award-winning products span control and automation, switching, distributed digital and analogue audio and video, and technology management. They are implemented worldwide in conference rooms, homes, classrooms, network operation / command centres, hotels, entertainment venues, broadcast facilities, among others.
